

For sale Blade 250CFX with many extra Parts.

I bought this Helo used. It has two batteries. I will say this up front. It needs a full trim setup. I have the swash plate tool for setting the head, its machined aluminum. When I bought it the Carbon blades were cracked so I swapped them out.

Make an offer, I paid \$200 with the two batteries and no spare parts. I really don't know where to start because its used, so if your interested, make an offer.
